double jump so so so so so so so soooooooooooooo anti-human . I

platformer. Some people don't like the controls, but they are fine in my opinion. The game has good graphics, an easy to use level editor and even a shader editor! This is a fantastic game for the price.. Well, Indie.Check Nice value on STC.Check Full controller support. Check Eye strain because of lame graphics. Check Difficulty. Eh Fun. Sure Workshop. Cool&Promosing Conclusion, Satisfy your need to kill some time when you are handling some other work and have some spare time.. I actualy got this game from a coopon for 30 cents and im prety satisfied. Pros: - Really cool looking. - Colors and animations on the background match together so well. - workshop included. - 30 basic levels that are unique.. Great and original platformer. Some people don't like the controls, but they are fine in my opinion. The game has good graphics, an easy to use level editor and even resolution and add more levels and it would be worth my time to play. It's clever, but there is to much light pulsing on the screen, it gives an immidiate headache. You can't turn it off in the options because the menu is broken. I don't know what these guys where thinking about. It's like playing the rainbow road on Mario kart, but the entire game all the time.. It's clever, but there is to much light pulsing on the screen, it gives an immidiate headache. You can't turn it off in the options because the menu is broken. I don't know what these guys where thinking about. It's like playing the rainbow road on Mario kart, but the entire game all the time.
